8. (Amended) An information reproducing apparatus for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information; and second reproduction control information to reproduce only the audio information out of the substantial information, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone, said information reproducing apparatus comprising:

132  
cont

a reading device for reading the substantial information and the second reproduction control information from said information record medium; and

a reproducing device for reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

9. (Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information; and second reproduction control information to reproduce only the audio information out of the substantial information, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second

reproduction control information is recorded in the audio zone, said information reproducing method comprising:

832  
cont

a reading process for reading the substantial information, the first reproduction control information and the second reproduction control information from said information record medium; and

112  
cont

a reproducing process for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed, and reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

10. (Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information; and second reproduction control information to reproduce only the audio information out of the substantial information, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone, said information reproducing method comprising:

a reading process for reading the substantial information and the first reproduction control information from said information record medium; and

a reproducing process for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed.

11. (Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information; and second reproduction control information to reproduce only the audio information out of the substantial information, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone, said information reproducing method comprising:

a reading process for reading the substantial information and the second reproduction control information from said information record medium; and

a reproducing process for reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

Please add new claims 12-17 as follows:

--12. An information reproducing apparatus according to claim 6, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.

13. An information reproducing apparatus according to claim 7, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.

14. An information reproducing apparatus according to claim 8, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.

15. An information reproducing method according to claim 9, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.

16. An information reproducing method according to claim 10, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.

17. An information reproducing method according to claim 11, wherein the information record medium further comprises another substantial information including only audio information recorded in the audio zone.--
